Profile: Software Automation Developer with 6.1 years of experience in Software Testing, Automation, and Quality Assurance. Expertise in Java, Python, Selenium WebDriver, TestNG, Maven, and Cucumber BDD for designing and maintaining automation frameworks. Skilled in API Testing, SQL Validation, System Validation, Azure DevOps, CI/CD pipelines, and Agile methodologies. Experienced in leveraging Generative AI and AI-assisted testing tools for test case generation, automation scripting, defect analysis, and test optimization. Proven track record of improving test coverage, reducing manual effort, and delivering high-quality software releases.

Employment History: AspireNXT Pvt Ltd– Software Testing Engineer, Aug2026-Present , Bengaluru, Karnataka, India

Key Responsibilities:

- Analyze requirements and design detailed test scenarios, test cases, and test plans for software applications.
- Perform functional, regression, integration, UI, and API testing using Selenium WebDriver, TestNG, Cucumber, Postman, and REST Assured.
- Develop and maintain automation frameworks using Java, Python, Selenium, and BDD practices.
- Identify defects, validate fixes, and collaborate with cross-functional teams to deliver high-quality software.
- Support Agile testing practices, CI/CD integration, test reporting, and continuous improvement activities.

Experience:

Freelance AI Developer | AI Automation Engineer | Mar-Jul2026 | Bengaluru, Karnataka, India

- Developed AI-based applications using Python, OpenCV, Streamlit, Flask, and Machine Learning frameworks.
- Built Computer Vision, Speech AI, and automation solutions integrated with web applications.
- Developed an AI-based Elderly Health Monitoring Platform with predictive analytics and real-time visualization.
- Performed testing, debugging, validation, and optimization to ensure application quality and reliability.

Tata Consultancy Services(Client:Google)– Media QA / Software Automation Engineer/ Software Validation and Verification Engineer/ Oct 2022 – Feb2026 | Bengaluru.

Appreciation: Prevented major client escalation – Sep 2024

Award: Star of the Month – Jul 2023

- Developed and maintained automation test scripts using Java, Python, and Selenium WebDriver.
- Built automation frameworks using TestNG, Maven, POM, and Cucumber BDD with Jenkins CI/CD integration.
- Performed functional, regression, API, and backend validation testing using REST Assured and SQL.
- Automated end-to-end testing, defect tracking, and release validation using JIRA and Azure DevOps.

M.S. Ramaiah Institute of Technology–R&D–Medical Devices*Independent Consultant* |Jun 2021–July 2022

- Worked on development and validation of medical cardiac loop recorder devices
- Performed firmware validation, system integration testing, and V&V activities

- Conducted signal analysis and test validation using MATLAB and LabVIEW
- Supported prototype debugging, testing documentation, and device validation workflows
- Collaborated with engineering and research teams on embedded medical system projects

M.S. Ramaiah Institute of Technology – R&D (Medical Devices) Intern – Medical Device Development & Testing.

- Supported development of medical cardiac loop recorder devices.
- Performed firmware validation and system integration testing.
- Conducted signal analysis using MATLAB and LabVIEW.
- Assisted in Verification & Validation (STLC) for medical devices.

Accel Frontline Limited Role: Software Testing & QA Engineer – Hardware & System Validation.

- Conducted functional and system testing for laptops, BIOS, and firmware.
- Executed test cases, logged defects, and tracked issues in JIRA.
- Developed automation scripts to support system validation.
- Performed hardware-software integration testing.
- Validated system performance and stability through stress testing.

Education:

M.S. RAMAIAH INSTITUTE OF TECHNOLOGY–Bangalore, India. Sep2017-May/2021
Bachelor of Engineering Medical Electronics (B.E).

Automation Tools

- Selenium WebDriver
- TestNG
- Apache Maven
- Postman
- Cucumber
- Azure DevOps
- GitHub Copilot
- Prompt Engineering
- AI-assisted Software Testing
- AI-assisted Test Automation

Version Control

- Git
- GitHub

Programming Languages

- Java
- Python
- C & C++
- HTML

Testing Expertise

- Functional Testing
- Regression Testing
- Integration Testing
- System Testing
- API Testing
- Performance Testing

Automation Framework Skills

- Page Object Model (POM)
- Data Driven Framework
- Selenium Automation Framework
- Java Automation Development
- Python Automation Development

Other Skills

- SQL Database Validation
- CI/CD Pipeline Integration
- Agile Methodology
- Defect Tracking (Jira)

Core Competencies

- REST API Testing
- Test Case Design
- Debugging & Root Cause Analysis
- Continuous Integration Testing

Interests

- Automation Framework Development
- Software Testing Technologies
- Electronics & Embedded Systems
- Cooking & Music
