Profile: Software Automation Test Engineer with 5.9 years of experience in Software Testing, specializing in Java/Python Selenium Automation and System Validation. Experienced in designing, developing, and maintaining automation frameworks using Selenium WebDriver, TestNG, Maven, and Cucumber BDD. Strong expertise in API Testing, SQL Validation, Azure DevOps, CI/CD integration, HTML, and Agile methodologies. Proven ability to deliver high-quality, scalable automation solutions, improve test efficiency, and support end-to-end software quality assurance.

Employment History: Tata Consultancy Services (Client: Google) – Software Automation Engineer / Software Validation and Verification Engineer / Oct 2022 – Present | Bengaluru.

Appreciation: Prevented major client escalation – Sep 2024

Award: Star of the Month – Jul 2023

Key Responsibilities

- Developed and maintained automation test scripts using Java / Python and Selenium WebDriver.
- Designed and implemented a robust automation framework using Java, TestNG, Maven, Page Object Model (POM), and Cucumber (BDD), integrated with Jenkins CI/CD and GitHub.
- Automated web and backend validation scenarios, improving test coverage and execution efficiency.
- Performed API testing using REST services and validated responses.
- Integrated automation suites into Jenkins-based CI/CD pipelines to enable continuous testing.
- Executed functional, regression, and system testing for web and backend applications. Used SQL queries to validate backend data and ensure system integrity.
- Identified, logged, and tracked defects using JIRA, collaborating with developers for timely resolution.
- Performed end-to-end testing of distributed systems and device telemetry platforms.
- Monitored system behavior and performance during release cycles.
- Supported Verification and Validation (STLC) activities within Media Quality Assurance.
- Worked with Azure DevOps for test management, sprint tracking, and CI/CD coordination.
- Integrated automation suites with Jenkins/Azure DevOps pipelines.

R&D Engineer – Medical Devices

Independent Consultant | Jun 2021 – July 2022

- Worked on development and validation of medical cardiac loop recorder devices
- Performed firmware validation, system integration testing, and Verification & Validation (V&V) activities
- Conducted signal analysis and test validation using MATLAB and LabVIEW
- Supported prototype debugging, testing documentation, and device validation workflows
- Collaborated with engineering and research teams on embedded medical system projects

M.S. Ramaiah Institute of Technology – R&D (Medical Devices) Intern – Medical Device Development & Testing.

- Supported development of medical cardiac loop recorder devices.
- Performed firmware validation and system integration testing.
- Conducted signal analysis using MATLAB and LabVIEW.
- Assisted in Verification & Validation (STLC) for medical devices.

Accel Frontline (Third-party Dell Company) Role: Software Testing & QA Engineer – Hardware & System Validation.

- Conducted functional and system testing for laptops, BIOS, and firmware.
- Executed test cases, logged defects, and tracked issues in JIRA.
- Developed automation scripts to support system validation.
- Performed hardware-software integration testing.
- Validated system performance and stability through stress testing.

Education:

M.S. RAMAIAH INSTITUTE OF TECHNOLOGY–Bangalore, India. 09/2017-08/2021

Bachelor of Engineering Medical Electronics (B.E).

Automation Tools

- Selenium WebDriver
- TestNG
- Apache Maven
- Jenkins
- Postman
- Cucumber
- Azure DevOps

Version Control

- Git
- GitHub

Programming Languages

- Java
- Python
- C
- C++
- HTML

Testing Expertise

- Functional Testing
- Regression Testing
- Integration Testing
- System Testing
- API Testing
- Performance Testing

Automation Framework Skills

- Page Object Model (POM)
- Data Driven Framework
- Selenium Automation Framework
- Java Automation Development
- Python Automation Development

Other Skills

- SQL Database Validation
- CI/CD Pipeline Integration
- Agile Methodology
- Defect Tracking (Jira)

Core Competencies

- REST API Testing
- Test Case Design
- Debugging & Root Cause Analysis
- Continuous Integration Testing

Interests

- Automation Framework Development
- Software Testing Technologies
- Electronics & Embedded Systems
- Cooking & Music
